

When you switch your mortgage from your current provider to another lender, this is known as remortgaging. This guide outlines the process for you step by step so you know what to expect on your mortgage journey.

## Step 1 – Review your current mortgage deal

When you are switching you can choose to change the mortgage term or the amount that you're borrowing. This is a good opportunity to see if you can save on your monthly repayments by choosing a mortgage with a lower interest rate or plan.

Remember, your lender may charge you if you pay off your mortgage before the end of the term. This is called a breakage cost. There may also be a redemption charge or exit fee.

Make sure you've done your research so you know the costs involved and can make an informed decision.

## Step 2 – Decide which deal suits you

Take your time to research the best deal for you. Use our mortgage calculator to help you compare your existing mortgage with our mortgage rates on offer and find out how much your repayments are likely to be. Your Mortgage Intermediary can also help you do this.

## Step 3 – Finalise your new deal

Firstly, we will assess your application and carry out the relevant credit checks. You can also view our Mortgage application form available from your Mortgage Intermediary, to find out what information we will need you to provide us with. Don't worry about completing this in advance as your Mortgage Intermediary will take you through the process at your mortgage appointment.

You will need to provide us with some documentation so that we can process your application. Here is a guideline of what you might need but your Mortgage Intermediary can talk you through this.
